SERIES 2152

Fluorescent inspection/utility lights feature cool multi-directional illumination with efficient long life bulbs.

Ideal for confined areas where object or task is near the light source or in large spaces where general illumination is desirable.

Designed to take abuse, Series 2152 lamps are water resistant and stand up against most corrosive materials.

SPECIFICATIONS

HOUSING

Yellow neoprene handle and end cap.
 Plastic hang-up hook.

TUBE SHIELD

Tough butyrate plastic with reflector.

CORDS

DC Models - 25 ft. long 16/2 SJO cord or 12 ft. extended SVO coil cord with cigarette lighter plug.
 AC Models - 50 ft. yellow SJo cord with in-line ballast on cord, 2 ft. primary cord and 3-wire plug. 220 volt models use black cord and ballast enclosure.

LAMP

Standard F15T8/CW or F8T5/CW.
 Black light (ultraviolet) lamps also available for special applications.
